Experience

Computer Science Dept.

September 2023 – January 2024

Mobile App developer

UET, Lahore

- Led the creation of an advanced Food Delivery App Platform and Successfully completed an industry-level project, the Food Square app, demonstrating expertise in designing, developing, and implementing functional and user-friendly mobile applications.

Projects

SimplePay App | Flutter, NodeJs, Mongodb

June 2024

- Developed SimplePay App, a mobile application that functions as a clone of Sadapay, providing users with the ability to conduct transactions across Pakistan to any bank or wallet.
- Incorporated features that allow users to easily manage credit card information and transactions in a straightforward and user-friendly manner.
- Implemented security measures to ensure the safety and privacy of user data during transactions.

Microphone Permission Checker App | Flutter, Information Security

May 2024

- The Microphone App Permission Checker app offers users a convenient way to check which apps on their device have been granted microphone permissions, helping them stay informed about their privacy settings.
- By providing suggestions on which apps may not necessarily require microphone access for optimal functionality, the app empowers users to make informed decisions about their privacy and data.

Food Square Mobile App | Flutter, NodeJs, Mongodb

January 2024

- Developed Food Square Mobile App enabling restaurants to register their business and provide online food ordering, table reservation, and other services.
- Streamlined operations and expanded reach for restaurants, optimizing the dining experience for businesses and customers alike.

PostFix Mobile App | Flutter, Firebase

August 2023

- Although Postfix is a social media platform that functions in much the same way as Instagram does, it also provides users with an effortless time on it through almost all of Instagram's features.
- Users can enjoy sharing photos and videos, explore content from other users, connect with friends and followers, and engage through likes, comments, and direct messaging, all within the familiar and user-friendly interface of the Postfix app.

Technical Skills

Languages: Dart, Flutter

Developer Tools: VS Code, Android Studio
